DETAILED ACTION

Status of Claims

New claims 35-49 are pending in the instant application. Claims 1-34 are cancelled.

Status of Restriction Requirement and Election of Species

Claims 45 and 47 are not commensurate in scope to applicant's elected specie (example 25 of the instant specification, see the discrepancy in substituent R₂). Therefore, these claims are withdrawn from consideration.

Status of Claim Objections

Applicant's cancellation of claim 33, see Remarks, filed 6/4/2009, with respect to the Non-Final Office Action mailed 3/5/2009, has been fully considered and the objection has been overcome.

Status of Rejections

35 USC § 112 (2nd Paragraph)

Applicant's cancellation of claims 27-29, see Remarks, filed 6/4/2009, with respect to the Non-Final Office Action mailed 3/5/2009, has been fully considered and the rejection has been overcome.

35 USC § 102

Applicant's amendment of claim 35 (in reference to the 102 rejection of claims 20-26 and 34) see Remarks, filed 6/4/2009, with respect to the Non-Final Office Action mailed 3/5/2009, has been fully considered and the rejection has been overcome.

New Objections and Rejections

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 35-42, 44, 46, and 49 are rejected under 35 U.S.C. 102(b) as being anticipated over Shepard *et al.* (US Patent 3,573,306).

Shepard *et al.* teach the following compound: N-(2-pyridyl)-3,5-diamino-6-chloropyrazinecarboxamide (see attached abstract),

wherein R₁ = H, R₂ = Cl, and R₃₋₄ = amino that read on the aforementioned claims and are therefore anticipated.

Claims 35-42, 44, 46, 48, and 49 are rejected under 35 U.S.C. 102(b) as being anticipated over Cragoe *et al.* (US Patent 3,577,418-mentioned in IDS).

Art Unit: 1624

Cragoe *et al.* teach the following compound (see col. 27, line 1):

wherein $R_1 = H$, $R_2 = Cl$, $R_3 = \text{dimethylamino}$, and $R_4 = \text{amino}$ that read on the aforementioned claims and are therefore anticipated.

Conclusion

No claims are allowed.

Claim 43 is objected to as being dependent upon a rejected base claim, but would possibly be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Potential Reasons for Allowance

Claim 43 is potentially novel in respect to compounds possessing hydrogen and methyl substituents at variable R_3 .

The limitations listed *supra* represent the limitations that are not taught or fairly suggested by the prior art.

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the

Art Unit: 1624

shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
